EXECUTIVE SUMMARY

Entry-level Cybersecurity professional with hands-on experience in SOC monitoring, incident triage, log analysis, threat hunting, detection engineering, network traffic analysis, and vulnerability assessment. Experienced with SIEM and security monitoring platforms including Splunk, Wazuh, Elastic Security, and Microsoft Sentinel across Windows and Linux environments. Skilled in analyzing security events, investigating suspicious activity, developing and tuning detection rules, and documenting and escalating incidents. Strong foundation in MITRE ATT&CK, NIST Cybersecurity Framework, ISO/IEC 27001 fundamentals, attack chain analysis, and security operations, with a focus on threat detection and incident response.

EXPERIENCE

- **Intern | Sworks Infotech Pvt Ltd | May 2025 – July 2025**

Supported security operations through monitoring, analysis, and documentation of security events using SIEM and IDS/IPS tools. Assisted with vulnerability assessments and security reviews across systems and applications. Performed network traffic analysis and log inspection using Wireshark, Wazuh, and Snort to identify suspicious activity. Contributed to incident response workflows by documenting findings, risks, and mitigation recommendations while following established escalation procedures.

PROJECTS

- **Security Detection Engineering & Attack Chain Analysis | Elastic Security**

- Engineered Atomic, Stateful, Correlation-based, and Anomaly-based detections across reconnaissance, RDP brute-force, credential access, and lateral movement using KQL, EQL, and MITRE ATT&CK.
- Developed and validated threshold and correlation rules to detect password spraying and successful RDP authentication following multiple failed attempts.
- Tuned detection logic using thresholding, session-based grouping, suppression, and deduplication, reducing reconnaissance alerts from 22 to 1.

- **Wazuh SIEM & XDR Platform Exploration | Wazuh**

- Configured and investigated Windows and Linux endpoints using Wazuh for security monitoring, log analysis, vulnerability detection, and threat hunting.
- Performed CIS benchmark assessments and CVE analysis to identify configuration weaknesses and vulnerable software across monitored systems.
- Investigated Windows Defender telemetry and identified a Cobalt Strike malware signature while exploring Sysmon ingestion, custom decoders, detection rules, FIM, and Active Response.

- **SIEM-Based Log Analysis & Threat Investigation | Splunk**

- Investigated Windows, Linux, and web server logs using Splunk to identify suspicious activity and attack patterns.
- Detected malware execution, persistence, privilege escalation, and brute-force activity through log correlation.

- **Windows Endpoint Compromise & Kill Chain Investigation | Windows/Sysmon**

- Investigated a simulated Windows compromise using Security Logs, Sysmon, and PowerShell history.
- Traced malware execution, privilege escalation, persistence, C2 communication, and identified relevant IOCs.

SECURITY OPERATIONS EXPERIENCE (VIRTUAL PROGRAMS – FORAGE)

- TCS Cybersecurity – IAM Developer Virtual Job Simulation (December 2025).
- Shields Up: Cybersecurity Virtual Experience Program – AIG (December 2025).
- Datacom Cyber Security Operations Virtual Experience Program (December 2025).

TECHNICAL SKILLS

- **Security Operations:**
Security Monitoring, Alert Analysis, Incident Triage, Incident Investigation, Log Analysis, Threat Hunting, Threat Identification, Vulnerability Assessment, Incident Response, Incident Escalation.
- **SIEM & Security Tools:**
Microsoft Sentinel, Splunk, Wazuh, Elastic Security, Sysmon, Wireshark, Nmap .
- **Detection Engineering:**
KQL, EQL, Detection Rules, Alert Tuning, Threshold Detection, Correlation Detection, Anomaly Detection, False Positive Analysis.
- **Security Frameworks & Standards:**
MITRE ATT&CK, NIST CSF, ISO/IEC 27001 Fundamentals.
- **Security Analysis:**
Attack Chain Analysis, CVE Analysis, IOC Analysis, Malware Analysis, Security Event Correlation
- **Networking :**
TCP/IP, DNS, DHCP, HTTP/HTTPS, Network Traffic Analysis, Network Security
- **Operating Systems:**
Windows, Linux.
- **Reporting & Documentation:**
Incident Reports, Investigation Notes, Security Event Documentation, Handover Summaries, Technical Documentation.

CERTIFICATIONS & TRAINING

- Fortinet – Cybersecurity and Cloud Fundamentals 1.0 | September 2026
- Fortinet NSE 2 – Introduction to Next Generation Firewall 1.0 | October 2026
- Intro to Splunk – Splunk Education | January 2026
- TryHackMe SOC Level 1 | In Progress
- AWS Security Learning Plan – Threat Detection and Incident Response | In Progress

EDUCATION

- M.Sc Cyber Forensics and Cyber Security | Amity University | Noida, Uttar Pradesh, India - (Aug 2024 – May 2026)
- B.Sc Forensic Science | Madurai Kamaraj University | Madurai, Tamilnadu, India - (July 2021 – April 2024)

SOFT SKILLS

- Analytical Thinking
- Problem-Solving
- Attention to Detail
- Critical Thinking
- Incident Analysis
- Communication Skills
- Team Collaboration
- Time Management
- Adaptability
- Continuous Learning
